

GLORIA

SPORTS ARENA

WHERE CHAMPIONS TRAIN

Gloria Sports Arena (GSA) is a modern sports complex with indoor, outdoor and aquatic sports facilities.

Built on 105.000 m2 (10.5 hectares), it is the largest sports arena in Turkey , which includes international-standard training facilities with cutting-edge equipment for over 50 different sports.

Gloria Sports Arena, situated in Belek-Antalya-Turkey, is 30 minutes away from Antalya International Airport and is connected with Gloria Hotels & Resorts (Gloria Golf Resort, Gloria Verde Resort and Gloria Serenity Resort) which are in only 5 km distance (Free shuttle available).

GSA offers professional services for individual athletes, teams and groups, such as:

- > National Teams, Clubs
- > Sports Groups
- > Professional, Amateur & Recreational Athletes
- > All Season Training Camps & Summer Schools
- > Tournaments
- > Events, Congresses, Conventions and Conferences

FLOOR PLAN

Shining sun and fresh air on the Gloria Sports Arena.

The typical Mediterranean climate of the Antalya region stands out due to its warm summers and mild winters. While summer temperatures can rise to 36°C, winter is blessed with temperatures up to 20°C, thus making Antalya one of the few destinations in Turkey suitable for sports training throughout the year.

ANTALYA	January	February	March	April	May	June	July	August	September	October	November	December

OUTDOOR SPORTS

The 35 000 m² outdoor facilities include a stadium for 1700 spectators and various sports fields.

OUTDOOR SPORTS TRACK & FIELD

World Athletics approved athletic fields and equipment for all track & field events with competition timing system.

Training Areas

- Track & Field areas are certified as Class 2 by World Athletics
- 8-lane 400 meter oval track with an World Athletics certified surface
- 4-lane 110 meter indoor running track with 10 meters split times measurement system
- 1,7 km natural running trail surrounding the premises
- 3 outdoor pits for long and triple jump
- 1 indoor pit for long and triple jump
- 2 hammer and discus cages
- 3 shot put areas
- 3 javelin throw runways
- 2 high jump and 2 pole vaulting mats
- 1,5 & 2,5 degrees incline running track
- 20 and 60 cm high tartan covered training stairs
- 2000m² main gym with Technogym Cardio & Strength Training Devices
- Indoor cycling studio with 24 bikes
- Weightlifting studio with ESP full racks and free standing platforms
- Combat sports studio with functional training equipment (TRX, Bosuball and Pilates Balls, etc.)
- Studios for Mat and Group train
- Stair climbing areas with various heights

Track & Field Specific Equipment

- Javelin, discus, shot put and hammer sets
- 100 height & counterweight adjustable hurdles

- Speed sacs
- Training equipment (cones, slalom sets, hurdles, agility ladders, etc.)
- Vertimax vertical jump and speed training device
- Photo finish system with wind speed detection
- Portable time measurement system

Track & Field Specific Tests and Training Opportunities

- 30 m sprint analysis with OPTOJUMP system to analyze various phases
- Aerobic capacity (Lactate & VO₂max tests) – HP Cosmos treadmills and QUARK CPET
- Anaerobic power test with MONARK ergometer
- Isokinetic strength tests and training with ISOMED 2000
- VALD PERFORMANCE **Force Decks:** Comprehensive jump and lower limb performance analysis.
- **NordBord:** Essential hamstring strength assessment.
- **Force Frame:** Versatile and accurate strength testing.
- Body Composition with gold standard BODPOD

OUTDOOR SPORTS FIELD HOCKEY

One artificial turf hockey pitch in FIH standards.
(Polytan Megaturf Coolplus / used in London 2012 and Rio de Janeiro 2016 Olympic games)

Venue of the FIH World
League Round 1 Tournament /
September 2016

Training Center for the Olympic
Bronze Medalists in RIO 2016
– the German National Hockey
Teams Men & Women

Training Areas

- 91.40 x 55 m synthetic turf hockey field with Polytan megaturf coolplus
- 2000 m² main gym with Technogym Cardio & Strength Training Devices
- Indoor cycling studio with 24 bikes
- Weightlifting studio with ESP full racks and free standing platforms
- Combat sports studio with functional training equipment (TRX, Bosuball and Pilates Balls)
- Studios for Mat and Group training
- 1,7 km outdoor natural running trail
- 1,5 & 2,5 degrees incline run
- Stair climbing areas with various heights

Field Hockey Specific Tests and Training Opportunities

- Aerobic capacity (Lactate & VO₂max tests) – HP Cosmos treadmills and QUARK CPET
- Isokinetic strength tests and training with ISOMED 2000
- Agility tests and trainings with SPEEDCOURT
- Anaerobic power test with MONARK ergometer
- HYDROWORX for post injury training and conditioning
- Vertimax vertical jump and speed training device
- Body Composition with gold standard BODPOD
- Jump tests with OPTOJUMP
- VALD PERFORMANCE
Force Decks: Comprehensive jump and lower limb performance analysis.
NordBord: Essential hamstring strength assessment.
Force Frame: Versatile and accurate strength testing.
- Footscan test for foot pathologies
- Anthropometric tests
- Field Hockey specific test protocols for all age group

OUTDOOR SPORTS FOOTBALL

Two football fields: One stadium field with a spectator's capacity of 1.700 people and one training field. One more football training fields are also available at the Gloria Football Center, 5 minutes away from Gloria Sports Arena with free shuttle service. Football fields are built according to FIFA standards.

Training Areas

- 105 x 65 m stadium field with a spectator's capacity of 1.700 people
- 100 x 65 m training field
- 2000 m2 main gym with Technogym Cardio & Strength Training Devices
- Indoor cycling studio with 24 bikes
- Weightlifting studio with ESP full racks and free standing platforms
- Combat sports studio with functional training equipment (TRX, Bosuball and Pilates Balls)
- Studios for Mat and Group training
- 1,7 km outdoor natural running trail
- 1,5 & 2,5 degrees incline run
- Stair climbing areas with various heights

Soccer Specific Equipment

- Training goals, mini goals
- Free kick sets
- Training equipment (cones, slalom sets, hurdles, agility ladders, sprint sleds etc.)
- Vertimax vertical jump and speed training device

Soccer Specific Tests and Training Opportunities

- Body Composition with gold standard BODPOD
- Isokinetic strength tests and training with ISOMED 2000
- Aerobic capacity (Lactate & VO_2 max tests) – HP Cosmos treadmills and QUARK CPET
- Anaerobic power test with MONARK ergometer
- Jump tests with OPTOJUMP system
- VALD PERFORMANCE
Force Decks: Comprehensive jump and lower limb performance analysis.
NordBord: Essential hamstring strength assessment.
Force Frame: Versatile and accurate strength testing.
- Agility tests and trainings with SPEEDCOURT
- 3D Posture and Spine analyses
- Footscan test for foot pathologies
- Gait Analysis with high speed cameras
- HYDROWORX for post injury training and conditioning
- Anthropometric tests
- Soccer specific test protocols for all age groups

OUTDOOR SPORTS

OUTHER OUTDOOR SPORTS

ARCHERY

Synthetic grass hockey field (90 x 54 m) for outdoor Archery training sessions, with 32 targets with WA/ FITA standards

BEACH VOLLEYBALL

Two beach volleyball courts in FIVB standards.

SPORT CLIMBING

One artificial climbing wall with three stages and bouldering area, for both amateur and professional climbers.

GOLF

The biggest golf course in Turkey with 45 holes, including two 18-hole championship courses and a 9-hole academy course. Gloria Hotels & Resorts has the largest practice facilities in Europe.

THE MULTIPURPOSE GREEN FIELD

Suitable for slackline, outdoor Pilates, yoga, cross training, and similar group activities and training sessions.

TENNIS

One synthetic turf and one hard tennis court.

INDOOR SPORTS

GSA has 6800m² of indoor sports facilities, including a multipurpose sports hall with telescopic tribunes that can be divided into four fields, as well as various multifunctional sports studios.

INDOOR SPORTS BASKETBALL

The 2270 m² multipurpose sports hall with telescopic tribunles can be divided into four separate fields. All equipment is approved by international federations and associations.

Training Areas

- 4 Neoshock parquet courts from Connors/ USA with FIBA approved Ceiling Hung Posts – GARED (USA)
- 1 Center Court with FIBA approved Portable Basketball System
- 2000m² main gym with Technogym Cardio & Strength Training Devices
- Indoor cycling studio with 24 bikes
- Weightlifting studio with ESP full racks and free standing platforms
- Combat sports studio with functional training equipment (TRX, Bosuball and Pilates Balls)
- Studios for Mat and Group training
- 1,7 km outdoor natural running trail
- 1,5 & 2,5 degrees incline running
- Stair climbing areas with various heights

- Aerobic capacity (Lactate & VO₂max tests) HP Cosmos treadmills and QUARK CPET
- Isokinetic strength tests and training with ISOMED 2000
- Anaerobic power test with MONARK ergometer
- Body Composition with gold standard BODPOD
- Jump tests with OPTOJUMP
- VALD PERFORMANCE

Force Decks: Comprehensive jump and lower limb performance analysis.

NordBord: Essential hamstring strength assessment.

Force Frame: Versatile and accurate strength testing.

- Agility tests and trainings with SPEEDCOURT
- Footscan test for foot pathologies
- HYDROWORX for post injury training and conditioning
- Basketball specific test protocols for all age groups

Basketball Specific Equipment

- Spalding and Molten training and match balls & Ball Carts
- Individual scoreboards for each court - BODET
- Vertimax vertical jump and speed training device
- Basketball Specific Test and Training Opportunities

INDOOR SPORTS VOLLEYBALL

The 2,263m² multipurpose sports hall features telescopic tribunes and can be divided into four separate fields. All equipment meets the standards set by international federations and associations, ensuring top-quality facilities for various sports and events.

Training Areas

- 4 Parquet floor training courts
- 1 Taraflex center court
- 1 Taraflex training court
- 2 Beach Volleyball courts
- 2000 m² main gym with Technogym Cardio & Strength Training Devices
- Indoor cycling studio with 24 bikes
- Weightlifting studio with ESP full racks and free standing platforms
- Combat sports studio with functional training equipment (TRX, Bosuball and Pilates Balls)
- Studios for mat and group training
- 1,7 km outdoor natural running trail
- 1,5 & 2,5 degrees incline running
- Stair climbing areas with various heights

Volleyball Specific Equipment

- Volleyball net sets – Gared (USA volleyball approved)
- Mikasa MVA200 balls-official match ball
- Ball carts - Mikasa
- Block training apparatus
- Pass training basket
- Podiums for spike and block training
- Vertimax vertical jump and speed training device

Volleyball Specific Tests and Training Opportunities

- Block touch, attack height and other jump tests with OPTOJUMP
- Aerobic capacity (Lactate & VO₂max tests) – HP Cosmos treadmills and QUARK CPET Exercise Testing
- Body Composition with gold standard BODPOD
- Isokinetic strength tests and training with ISOMED 2000
- VALD PERFORMANCE
- **Force Decks:** Comprehensive jump and lower limb performance analysis.
- **NordBord:** Essential hamstring strength assessment.
- **Force Frame:** Versatile and accurate strength testing.
- Agility tests and trainings with SPEEDCOURT
- HYDROWORX for post injury training and conditioning
- Anaerobic power test with MONARK ergometer
- Footscan test for foot pathologies
- Volleyball specific test protocols for all age groups

INDOOR SPORTS OTHER INDOOR SPORTS

SPORTS HALL

HANDBALL
GYMNASTICS
FUTSAL
FENCING
BADMINTON
TABLE TENNIS
ARCHERY

The 68x33m multi-purpose sports hall is designed for all indoor sports. It features a Neoshok floating sports floor system, with Taraflex flooring available for volleyball and handball training or games. Additionally, the hall can accommodate 16 archery training sections, complete with targets for indoor archery practice.

STUDIO I & II

WRESTLING
JUDO
TAEKWONDO
KARATE
AIKIDO
KENDO
BALLET
DANCESPORT
PILATES
YOGA

Studios I and II have a sliding curtain system so that each studio can be used separately. The parquet floor, ballet bar and mirror wall make the studios suitable for ballet, dancesport, Pilates and yoga. When separated, studios can be fully covered with tatami or wrestling mats for martial arts or wrestling.

COMBAT SPORTS STUDIO

BOXING
CROSSTRAINING
KICKBOXING
MUAY THAI

The boxing studio has special flooring, including the boxing ring with sandbags, speedbags, standing sandbags, double end speed balls and speed balls, Vertimax trainer and Technogym OMNIA 8 Cross Training Tower.

WEIGHTLIFTING STUDIO

WEIGHTLIFTING

Weightlifting studio is equipped with 5 ESP TotalPower full racks and 5 Technogym free standing platforms and 8 GYMHOX FULL RACKS

INDOOR CYCLING STUDIO

INDOOR
CYCLING

24 Technogym top-class indoor cycling bikes in a specially designed studio. It offers a perfect training environment with a special light and sound system.

AQUATIC SPORTS

GSA Aquatic Center offers 5800 m²
Olympic water sports facilities in close
proximity with the dryland training facilities.

AQUATIC SPORTS

Gloria Sports Arena Aquatic Center offers all Olympic water sports facilities adjacent to dryland training facilities. The 5800 m² aquatic facilities include 10-lane Olympic outdoor swimming pool, 5-lane 50 m indoor pool, 6-lane short-course (25m) outdoor swimming pool, Olympic diving pool, Olympic water polo pool, and rehabilitation pool. Gloria Sports Arena Aquatic Sports Center has a mobile Contemphas high speed video analysis system for all pools.

Pools and Facilities

- 10 lane outdoor & 5 lane indoor 50m equipped with Swiss Timing System
- 6 lane outdoor 25m
- Waterpolo equipped with Swiss Timing System
- Diving 1, 3, 5, 7.5, 10m platforms & 2x1m, 2x3m spring boards
- Synchronized swimming
- Underwater hockey & rugby...
- 2000m² main gym with latest Technogym Cardio & Strength training devices
- Indoor cycling studio with 24 bikes
- Weightlifting studio with ESP full racks and free standing platforms
- Combat sports studio with functional training equipment (TRX, bosuball & pilates balls, etc.)
- Studios for mat and group training
- 1,7 km outdoor natural running trail
- 1,5 & 2,5 degrees incline running
- Stair climbing areas with various heights

Swim-Specific Performance Tests

- Isokinetic measurement –Isomed 2000
- Body Composition with gold standard BODPOD
- Aerobic capacity (Lactate & VO₂max tests) – QUARK CPET
- Posture & spine analysis – Contemphas Video Analysis System
- VALD PERFORMANCE
 - Force Decks:** Comprehensive jump and lower limb performance analysis.
 - NordBord:** Essential hamstring strength assessment.
 - Force Frame:** Versatile and accurate strength testing.

SPORTS MEDICINE & ATHLETIC PERFORMANCE CENTER

Gloria Sports Arena provides all needs of athletes.

Sports Medicine & Athletic Performance Center
offers a wide range of medical, rehabilitation and
sports performance enhancement services.

Not only for athletes, open both for hotel guests and other clients.

SPORTS MEDICINE & ATHLETIC PERFORMANCE CENTER

SPORTS MEDICINE & ATHLETIC PERFORMANCE CENTER

Alongside cutting-edge technology, a multidisciplinary team of highly experienced professionals in sports medicine, sports science, athletic performance, and sports physiotherapy delivers a focused, integrated, and comprehensive service portfolio under unified clinical and performance leadership.

SPORTS-MEDICAL EXAMINATION & CHECK-UP

A structured, end-to-end assessment designed to identify musculoskeletal issues, optimize overall health, and mitigate injury risk through evidence-based diagnostic methodologies. This program is positioned as a best-practice pre-participation evaluation, recommended on an annual basis for both professional and recreational athletes. Scope of Services

- Comprehensive sports medical examination
- Holistic consultation and assessment of general health parameters
- Objective evaluation of current performance

capacity

- Detailed analysis of posture and the musculoskeletal system
- This examination provides a robust clinical baseline, supports informed training decisions, and ensures readiness for safe and sustainable sports participation.

ECG/STRESS ECG

The assessment of the heart's electrical

activity through electrocardiography (ECG) enables the systematic acquisition, recording, and advanced analysis of cardiac function at rest and, where appropriate, under exercise-related conditions. This evaluation provides critical insight into cardiovascular health, facilitating the early detection of rhythm disturbances, conduction abnormalities, and potential underlying cardiac risk factors. As a result, ECG constitutes a fundamental pillar of a comprehensive sports-medical examination, supporting safe athletic participation, individualized risk stratification, and evidence-based clinical and performance-related decision-making across both recreational and elite sport populations.

DIAGNOSTIC ULTRASONOGRAPHY

Modern color Doppler sonography is used for evaluation of the various structures of the musculoskeletal system. It can be used as an effective tool to monitor healing processes after injuries.

FUNCTIONAL MOVEMENT SCREEN

This standardized and efficient test battery utilizes a validated scoring system to identify functional limitations, movement asymmetries, and potential injury risk factors. The outcomes provide a clear, objective foundation for the design and implementation of targeted corrective exercise programs, supporting movement quality, performance optimization, and injury prevention.

RESTING METABOLIC RATE

Resting Metabolic Rate (RMR), which represents the body's energy expenditure at rest, is assessed using indirect calorimetry through precise gas exchange analysis. Once RMR is accurately determined, it enables individualized calculation of daily caloric requirements to maintain healthy body weight, as well as the additional energy needs associated with daily physical activity, training load, and lifestyle demands. This information forms a critical foundation for evidence-based nutritional planning and performance optimization.

SPIROMETRY

The functional capacity of the lung is an elementary aspect of successful sport activity. Spirometry is a medical test used to determine lung/breathing volume and air velocity for the assessment of pulmonary function.

NUTRITION CONSULTATION

Athletic performance is only possible if the organism receives the appropriate energy. SMAPC supports amateur and professional athletes by developing individual diet plans based on health and physical activity goals.

ANTHROPOMETRIC MEASUREMENTS

Branch-specific anthropometric

characteristics of athletes are systematically assessed using validated measurement protocols, meticulously documented, and analyzed to ensure high precision, reliability, and applicability. The collected data provide a robust foundation for performance profiling, talent identification, training individualization, and long-term athletic development strategies.

BOD-POD

Bod Pod® is considered as the practically Gold Standard for body composition assessment. It is the world's only Air Displacement Plethysmography system using whole body densitometric principles to measure body composition (body density, body fat and fat-free mass) in adults and children.

TANITA – BIOELECTRICAL IMPEDANCE

Bioelectrical Impedance Analysis (BIA) is a commonly used method for estimating body composition. Tanita has a patented way of measuring BIA that is faster, easier, less intrusive and includes a precision scale making this a simple one-step process.

A wide range of essential anthropometric, physiological, biomechanical, nutritional, training, talent-related, and injury-history parameters that influence sports performance can be systematically assessed, monitored, and optimized to support safe, efficient, and sustainable performance development.

16-CHANNEL WIRELESS EMG

Using surface electrodes the electrical phenomena on the skeletal muscles are measured and recorded within the scope of motion sequences. Such EMG-measurements allow documentation on the coordination of the muscles/muscle groups involved, their stress intensity and the fatigue status of the respective muscular system.

BALANCE – COORDINATION – PROPRIOCEPTION

Dynamic platform allows qualitative and quantitative evaluation of the ability of the musculoskeletal system of individual athletes to stabilize the mechanical axis on unstable ground/conditions. The results identify individual deficiencies.

WINGATE ANAEROBIC CAPACITY TEST

The Wingate Test is a standard test method to determine anaerobic capacity, implemented as an ergometer test with short-time maximum load.

SPORTS MEDICINE & ATHLETIC PERFORMANCE CENTER

VO₂max TEST

Maximal oxygen uptake (VO₂max), assessed through breath-by-breath gas analysis, represents a gold-standard indicator of aerobic capacity and cardiorespiratory fitness. It serves as a primary criterion for evaluating an athlete's endurance performance and overall stamina, providing objective data to support training prescription, performance benchmarking, and longitudinal monitoring.

LACTATE ANALYSIS

It determines the individual anaerobic threshold level (maximum effort levels under lactate-steady-state conditions) and the aerobic threshold level by measuring during and after-effort lactate values. The threshold levels allow the exact intensity of a target-oriented endurance training.

OPTOJUMP – SPRINT & GAIT ANALYSIS SYSTEM

This assessment identifies individual aerobic and anaerobic thresholds by analyzing blood lactate concentrations during and following graded exercise. Determination of the maximal lactate steady state enables precise definition of sustainable and high-intensity effort levels. These threshold values form the foundation for accurately prescribing and monitoring targeted endurance training intensities, ensuring optimal performance adaptation and training efficiency.

SMAPC offers a comprehensive range of sports medicine services emphasizing the prevention, treatment, physiotherapy and rehabilitation of sports-related injuries of elite, amateur and recreational athletes. SMAPC provides health services not only to athletes, but also to patients of all ages and physical activity levels who can benefit from unique combination of the services.

FOOTSCAN – GAIT ANALYSIS

High-precision plantar pressure measurements enable a comprehensive clinical gait analysis, delivering detailed insight into load distribution, movement mechanics, and foot function. This assessment supports the identification of injury risk factors, biomechanical inefficiencies, and running economy, providing actionable data for performance optimization and preventive intervention.

CUSTOM MADE INSOLES

To address foot disorders and optimize lower-limb biomechanics, fully customized insoles are manufactured based on objective data derived from FootScan gait analysis. Using advanced CNC laser technology and 3D printing, each insole is precisely engineered to match the individual's plantar pressure profile and movement characteristics. This data-driven production process ensures high accuracy, durability, and optimal corrective support for both performance enhancement and injury prevention.

HILTHERAPIA

For many overload, traumatic or degenerative pathologies, high intensity laser, Hilterapia® produces important therapeutic effects by triggering a series of biological signals that contribute to the tissue mending and regeneration processes; moreover, it activates lymphatic drainage and microcirculation.

PRP (Platelet-Rich Plasma)

Platelet activation plays a key role in the process of wound and soft tissue healing. The use of platelet rich plasma (PRP), a portion of the patient's own blood having a platelet concentration above baseline, to promote healing of injured tendons, ligaments, muscles, and joints, can be applied to various musculoskeletal problems.

MANUEL THERAPY

"More than a massage" - Osteopath, Chiropractor and Sports Physiotherapist professions assess, treat and rehabilitate musculoskeletal injuries using manual therapy.

DRY NEEDLING

Sports Acupuncture & Trigger Point Dry Needling helps athletes of all ages achieve their best performance. It is one of the most effective hands-on tools for releasing chronic tension and restoring healthy, pain free mobility.

TAPING TECHNIQUES

Taping, Kinesio Taping, Dynamic Taping, and McConnell Taping Technique and others to help pain management, swelling control, tissue healing, functional improvement and injury prevention.

WIRELESS ELECTROSTIMULATION

Electrostimulation is an integral part of physiotherapy and pain management protocols, and also used in training programs to prevent injuries. By the help of wireless electrostimulation, muscular excitation occurs directly on the motor nerve using electrical pulses perfectly controlled to guarantee effectiveness, safety and comfort in use.

VERTIMAX

Cutting-edge training tools helps to improve vertical jump, speed and explosive power and acceleration at virtually any position.

MEDICALLY SAFE STRENGTH TRAINING

A specially designed and medically certified range of Technogym Medical equipment enables safe, controlled, and progressive strength training during rehabilitation and return-to-activity phases. This system supports precise load management, joint protection, and movement control, ensuring clinically safe execution while facilitating effective strength development and functional recovery.

UNLOCK YOUR ATHLETIC POTENTIAL WITH CUTTING-EDGE PERFORMANCE ANALYSIS

Introducing Our Premium Services: Force Decks, Force Frame, and Nord Board

Are you ready to elevate your training and achieve peak performance? Our state-of-the-art equipment and services provide unparalleled insights into your athletic capabilities, allowing you to optimize your training regimen. swimming and sport specific technical analysis.

Force Decks Analysis

- In-depth analysis of ground reaction forces
- Precise assessment of asymmetries and imbalances
- Customized feedback for performance enhancement

Force Frame Assessment

- Comprehensive evaluation of joint angles and movements
- Real-time feedback for technique improvement
- Injury prevention insights for long-term athletic success

Nord Board Testing

- Advanced hamstring strength and imbalance assessment
- Tailored exercises to address weaknesses.
- Injury risk reduction through targeted training

Why Choose Our Services?

- Cutting-edge technology for precise and reliable results
- Expert analysis and personalized feedback from experienced professionals
- Affordable pricing and special discounts for comprehensive packages
- Elevate your performance and reduce the risk of injuries.

Invest in Your Success - Empower Your Performance Today!

VALD PERFORMANCE

Our facility is equipped with state-of-the-art VALD performance equipment, including the Force Frame, NordBord, and Force Decks. The Force Frame provides accurate and versatile strength testing, the NordBord is essential for hamstring strength assessment and injury prevention, and the Force Decks offer comprehensive analysis of lower limb performance. These advanced tools ensure precise data collection and optimal training outcomes for athletes.

SPORTS MEDICINE & ATHLETIC PERFORMANCE CENTER

ISOKINETIC TESTING & TRAINING – ISOMED 2000

Isokinetic test and training systems allow the exact evaluation of muscular power during static isometric contractions and dynamic movement patterns with constant motion speed and concentric and/or eccentric muscle activity. With single joint force measurement, the turning time moment of the synergic and antagonistic muscles is measured joint-specifically. With multiple joint force measurement of the extremities the force-time-curve of the synergic and/or antagonistic muscle chains can be determined.

SPEEDCOURT – SPEED, AGILITY & COORDINATION TESTING & TRAINING

The SpeedCourt is a multifunctional training and measurement system for speed and agility, coordination, visual and cognitive perception and end stage rehabilitation. On a sports floor field of 50m², 12 sensor fields are embedded, connected and steered by highly sophisticated software. Variations of fundamental, motion, explosiveness and reactive speed, acceleration and agility, power, and injury prevention can be created by the coach and be visualized on a large screen for the athlete.

ICELAB -110 °C – WHOLE BODY CRYOTHERAPY

RECOVER FASTER

- More effective than traditional ice therapy
- Speeds up recovery after hard training sessions

INCREASE COLLAGEN PRODUCTION

- Helps you to look more younger by tightening the skin

IMPROVE IMMUNE SYSTEM

- Decreases the occurrence rate of cold and other health problems

REDUCE PAIN

- Reduces inflammation
- Lowers chronic pain

DESCREASE THE RISK OF INJURY

- Increases range of motion

INCREASE METABOLIC RATE

- 3 Minutes WBC is effective as 1 hour exercise
- Burns approximately 500 calories in 1 session

INCREASE ENDORPHIN LEVEL

- Feel more energetic
- Increases serotonin level and helps to overcome depression

INCREASE TESTESTERONE LEVEL

- Increases libido

UNDERWATER TREADMILL

Adjustable water depth (hydraulic lifting floor)

Adjustable resistance (counterflow jets)

Regular biofeedback (permanent installed underwater cameras)

- Targeted reduction of joint stress realized by changing the water depth.
- Hydrostatic pressure on the corresponding biologic structures to reduce posttraumatic swelling effects.
- Special characteristics of the water resistance allow the training intensity of the exercises to be exactly regulated by the athlete/patient within actual pain free range (fast speed movements create high training resistance, slow movements create low training intensities).
- A peripheral pressure on the skin-/soft tissue structures, which has equivalent effects of a massage.
- Water resistance creates higher muscular training intensity on the skeletal muscles, while at the same time the joint stress during the exercises is significantly reduced and thus overuse phenomena is prevented.
- Caused by increased training intensities of all integrated muscle groups the training stimulus for the cardiovascular system is consequently increased and creates optimized training adaptations to the involved biological structures.

SPORTS MEDICINE & ATHLETIC PERFORMANCE CENTER

PHYSIOTHERAPY EQUIPMENT

Zimmer MedizinSysteme

With more than 40 years experience Zimmer MedizinSysteme is the distinguished supplier of system solutions in medical technics.

With 40 years in the market of technical medicine, Zimmer MedizinSysteme is one of the leading European manufacturers of physiotherapy equipment. GSA has three therapy rooms, equipped with the newest Zimmer therapy devices. Our experienced team of sports scientists, physiotherapists and trainers is led by our specialist for sports medicine. Our goal is to bring you back into sports or daily life as fast as possible and without any pain.

Cryo6

Contrary to other cooling methods such as contact cooling, cryogenic spray or ice packs, the Cryo6 cools the skin temperature much faster with less danger of acid burns. It holds a constant dosage during the whole treatment.

PhySys SD

Device for electrostimulation, ultrasonic therapy and combined therapy.

OptonPro

This highly effective laser gives off up to 7 watts of power on two wavelengths at the same time via an ergonomically shaped applicator thus providing a broad spectrum of therapies. The High Power Laser OptonPro is ideal for the treatment of: musculoskeletal diseases, tendinopathies, myofascial pain syndrome, painful trigger-points, neuralgia and skin disorders.

Soleo SonoStim

SonoStim has multifrequencyultrasonic buttons, enabling the simultaneous transmission of two frequencies.

Thermo TK

This provides deep heat via high frequency electro therapy. Thermo TK can be applied for all acute and chronic pain in the musculoskeletal area. The patient receives high frequency electricity which cannot be felt and which creates a soothing effect at a deep level.

enPuls Version 2.0

With the help of an accelerated projectile in the handpiece a mechanical shock wave is created and transmitted onto the human body via an applicator button, also stretching out to the tissue.

PHYSICAL CHECK-UP

FOR CHILDREN (6-12 YRS.) "JUNIOR GLADIATOR PACKAGE"

Elite-level testing protocols provide objective insight into growth and physical development, supporting age-appropriate training and long-term athlete development rather than early specialization.

- Expert Physical Examination
- BODPOD Body Composition Analysis
- 3D Posture Analysis
- Balance & Proprioception Test
- FootScan Gait Analysis
- Speedcourt Test– Speed, Agility & Coordination
- Spirometry – Lung Capacity Tests
- Detailed Result Report
- Functional Movement Screen - FMS

FOR YOUNG (13-17 YRS.) "YOUNG ATHLETE PACKAGE"

Discover your physical sources to learn how to improve your performance capacity.

- Expert Physical Examination
- BODPOD Body Composition Analysis
- Balance & Proprioception Test
- Functional Movement Screen - FMS
- FootScan Gait Analysis
- Speedcourt Test– Speed, Agility & Coordination
- Vald Performance Force Decks: Comprehensive jump and lower limb performance analysis.
- NordBord: Essential hamstring strength assessment.
- Force Frame: Versatile and accurate strength testing.
- Spirometry – Lung Capacity Tests
- Isokinetic Strength Test
- Optojump Running Analysis
- Sprint Test
- Icelab -110°C Whole Body Cryotherapy
- Detailed Result Report

FOR ADULTS "PHYSICAL CHECK-UP PACKAGE"

Fathom your physiology and reveal your overall health and fitness level. The result report comes with individualized recommendations and training targets.

- Expert Physical Examination
- BODPOD Body Composition Analysis
- Resting Metabolic Rate Test
- 3D Posture Analysis
- Balance & Proprioception Test
- FootScan Gait Analysis
- Functional Movement Screen - FMS
- Submaximal Treadmill/Bicycle Test.
- Icelab -110°C Whole Body Cryotherapy
- Detailed Result Report

FOR ELITE ATHLETES "ELITE ATHLETE FULL CHECK"

A comprehensive and most up-to-date sports-specific protocol to determine your physiological characteristics and monitor the effectiveness of your training programs. It also provides "safe" and "effective" training zones.

- Expert Physical Examination
- BODPOD Body Composition Analysis
- 3D Posture Analysis
- Balance & Proprioception Test
- FootScan Gait Analysis
- Functional Movement Screen – FMS
- VALD PERFORMANCE Force Decks: Comprehensive jump and lower limb performance analysis.
- NordBord: Essential hamstring strength assessment.
- Force Frame: Versatile and accurate strength testing.
- Speedcourt Test– Speed, Agility & Coordination*
- Wingate Anaerobic Capacity Test*
- Maximal Oxygen Consumption Test – VO₂ max*
- Lactate test *
- Optojump Running Analysis*
- Sprint Test*
- High Speed Video Analysis (Contemphas)*
- Icelab -110°C Whole Body Cryotherapy
- Detailed Result Report

** Subject to change according to the sports branch*

The Golf Rehabilitation and Fitness Program at Gloria Sports Arena Health Center offers services to diagnose and treat golf-related spine or peripheral joint injuries to help you recover from injury or surgery, and safely return to the course.

We also offer proper golf fitness and endurance training that is crucial to get the most out of your game and avoid injuries. Our experts are able to detect faulty swing patterns and golf biomechanics, limiting you to perform a powerful golf swing. We can ensure you are optimizing your game and minimizing your chance of injury

GOLF FITNESS & CONDITIONING SERVICES

- Functional Movement Screen - FMS
- VALD PERFORMANCE - ForceDecks, Nordbord & Force Frame
- Golf Specific Core, Lower and Upper Body Exercises
- Balance & Stability
- Individualized at-home exercise programs

REHABILITATION SERVICES

- Comprehensive expert physical examination
- Evaluation of individual motion impairments with respect to the golf swing
- Supervised treatment provided by licensed physical therapists and sports medicine physician
- Skilled manual therapy and therapeutic massage
- Lumbar and cervical spinal decompressive traction as needed
- Diagnostic musculoskeletal ultrasound evaluations as needed

PROGRAMS & PACKAGES

GROUP SPECIFIC CAMPS

"Obesity, Fitness/Wellness, Women"

GSA conducts tailored fitness/wellness/training and education camps for a wide variety of groups: women, children, fitness clubs, schools, companies, corporate groups etc.

WEIGHT LOSS/HEALTHY LIFE PROGRAM

Introduce yourself to a healthy life! Fathom your physiology and take the first steps to move in the right direction of improving your overall health and well-being. Gloria Sports Arena offers guests the sophistication and credibility of a world renowned high performance center with the luxury of Gloria service and accommodations. This program is to help you better understand your body and adopt healthier lifestyle behaviors and attitudes, including exercise, nutrition, stress management, improved self-esteem, and affirmative thinking patterns. After a thorough evaluation process, our professionals will develop a customized package designed to accomplish your specific goals and health objectives – whether it be to get back into shape, to lose weight or maintain your weight, decrease your risk of disease, or just to feel better overall. All for helping you get back to feeling healthy and introducing physical activity (all levels) whilst having fun.

Related services include:

- Expert Physical Examination

Nutrition Consultation

- BODPOD Body Composition Analysis
- Resting Metabolic Rate Test
- Metabolic Holter Measurement
- 3D Posture Analysis
- Balance & Proprioception Test
- FootScan Gait Analysis
- Functional Movement Screen – FMS
- Submaximal Treadmill/Bicycle Test.
- VALD PERFORMANCE

Force Decks: Comprehensive jump and lower limb performance analysis.

NordBord: Essential hamstring strength assessment.

Force Frame: Versatile and accurate strength testing.

- Icelab -110° Whole Body Cryotherapy
- Detailed Result Report
- Personal Training
- Hydroworx Aquatraining

SPORTS REHABILITATION PROGRAM

The Sports Injury Rehabilitation Program at GSA offers specialized evaluation and treatment not just for athletes, but for any active person with a musculoskeletal problem who wants to return to physical activity. This includes those who have undergone orthopedic surgery or have sports- or work-related overuse injuries.

Our expert team of physicians, physiotherapists and athletic trainers also treat many conditions that do not require surgery, such as foot and ankle disorders, hip and knee injuries, neck, shoulder and lower-back pain, muscle strains and tears, ligament sprains, bursitis and tendinitis, and overuse injuries such as tennis elbow, runner's knee, swimmer's shoulder and golfer's elbow.

The program is designed to help you achieve your functional and sports-related goals by improving strength, coordination, balance, endurance, and specific sport skills.

We provide a full range of comprehensive services, including:

- Sport-specific exercises to return to sports
- Cardiovascular training
- Core-strengthening and stabilizing exercises
- Neuromuscular re-education
- Spinal/pelvic stabilization

Other related services include:

- Comprehensive expert physical examination
- Diagnostic musculoskeletal ultrasound evaluations
- PRP – Platelet Rich Plasma Injection
- Special Intralesional injections
- Icelab -110° Whole Body Cryotherapy
- Manual therapy
- Lymphedema therapy
- Sports Physiotherapy
- Child and Adult Physiotherapy
- Osteopathy
- Therapeutic massage
- Pre-activity massage
- Post activity/recovery massage
- Rigid taping /Kinesio-taping/ Dynamic Taping
- Electro-therapeutic treatments
- Electrostimulation
- Radial Shockwave Therapy (ESWT)
- HILTERAPIA (High intensity laser therapy)
- TECAR Deep Heat Therapy
- Local Cryotherapy
- Hydroworx Aquatraining
- Isokinetic Strength Training

PROGRAMS & PACKAGES

ELITE SOCCER PLAYER PROGRAM

TRAIN LIKE A PRO!

This program is designed for soccer players at an intermediate level or higher. Participants will be taught and analyzed by renowned coaches and professionals in sports physiology, biomechanics, nutrition, technique, injury prevention, resistance training, and flexibility training. Over the past three years, many elite soccer players from Turkey, Europe, and the Middle East have taken advantage of this opportunity, typically before preseason camps, to enhance their strength, power, endurance, flexibility, explosiveness, speed, agility, reaction time, coordination, anticipation, and muscular control.

Elite soccer players are welcome to join one of the scheduled preseason group camps, lasting 3 to 7 days, or to create a personalized program at any time of the year.

Related services include:

Test & Measurements:

- Expert Physical Examination
- BODPOD Body Composition Analysis
- 3D Posture Analysis
- Balance & Proprioception Test
- FootScan Gait Analysis
- Functional Movement Screen – FMS

• VALD PERFORMANCE

Force Decks: Comprehensive jump and lower limb performance analysis.

NordBord: Essential hamstring strength assessment.

Force Frame: Versatile and accurate strength testing.

- Speedcourt Test– Speed, Agility & Coordination
- Wingate Anaerobic Capacity Test
- Maximal Oxygen Consumption Test – VO₂ max
- Lactate test
- Optojump Running Analysis
- Sprint Test
- Detailed Result Report

Supportive Therapies for Regeneration & Recovery:

- Icelab -110° Whole Body Cryotherapy
- Hydroworx Aquatherapy
- Kneipp Pool
- HILTERAPIA
- TECAR Deep heat therapy

Special Training Sessions:

- Hydroworx Aquatraining
- Speedcourt Training
- Isokinetic Strength training
- Vertimax training
- Personal training
- Other group training sessions (Bouldering, Spinning, Zumba etc.)

ACCOMMODATION

Tailor-designed for the athletes comfort

Gloria Sports Arena offers 100 modern designed rooms with stadium view. The rooms are tailor-made for the needs of individual athletes and sport teams. There are 82 standard rooms (30 m²), 10 suite rooms (63 m²) and 8 disabled rooms (30 m²).

GASTRONOMY

Tailor-made for the athletes nutritional needs...

Gloria Sports Arena features Elly's Restaurant with a terrace, a lobby & lounge and a sports bar all with direct view of the stadium.

Guest will find a wide variety of international and regional specific dishes at Elly's Restaurant.

ACCOMMODATION

Gloria Hotels & Resorts also offers a wide range of exquisite accommodation with three luxurious and stylish 5-star resorts located at the beach: Gloria Golf Resort, Gloria Verde Resort and Gloria Serenity Resort.

GLORIA GOLF RESORT
